## Joker movie hd wallpapers 1080p

The world's most popular video sharing site is planning to offer content in all its high-resolution glory. YouTube has announced that it will allow users to upload and view video in full HD; a 1080p test video is now available. All of you viewers with fast computers and even faster broadband connections will soon be able to indulge in much more. It's been about a year since the Google-owned broadcaster released 720p video. In that time, full-HD camcorder became relatively common and more YouTube content was uploaded as 1080p, although it was not feasible as such. The company plans to recode all of this previously created material so viewers can take advantage of its original resolution. It's hard to believe that YouTube has only been around for just over four years. It won't be the first video sharing site to offer full HD, but it will certainly be the one to bring it to the masses. Alternately ridiculed and celebrated by blockbusters like Charlie Bit My Finger, YouTube recently became eager to present commercial content and compete with people like Hulu, a joint venture of three major broadcast networks. Last spring, YouTube began offering some premium Hollywood content; the term premium should be used freely, however, since the choices were thin. In September, the Wall Street Journal reported that YouTube was in serious conversations with major movie studios to stream movies on a rental basis. Switching to 1080p should support these initiatives. YouTube is conceivable to be able to deliver Blu-ray quality streams for paid content. For ordinary people, full HD will mean the chance to share these bloopers and family videos on a wall-sized screen. Auteurs should be aware that for now, YouTube will still limit user-generated content to 10 minutes in length. It seems plausible, however, that the current 2GB file size limit will receive an elevation considering how monstrously large these 1080p videos will be. Take off the cameras! This story, YouTube Adds 1080p HD was originally published by Macworld. Note: When you buy something after clicking links in our articles, we can earn a small commission. Current page: Best Blu-rays 4K Ultra HD Heroes and Villains After a commercially successful opening weekend amid controversy, the Joker filmmaker Todd Phillips, a frightening study of one of the most infamous fictional villains of all time, has paved a long way at the box office. The film broke box office records by grossing more than \$93 million in domestic ticket sales, earning Joker the special distinction of being the largest October premiere in the United States. Joaquin Phoenix, who plays the crazed criminal clown himself, received many accolades for his unique and disturbing performance. If you're a big movie fanatic, you'll probably notice some of the many movies that Joker honored. Even if you're not a big fan of movies, you Feel like one after finishing this article and you will still appreciate the wide range of psychological thrillers that inspired Joker to begin with. Joaquin Phoenix | Warner Bros. So before you book your ticket for the next exhibition of check out this list of films that either played a direct role in the initial development of the film or received a special nod in Joker. Anyway, you have an especially exciting and violently visceral movie marathon ahead of you. 'The Man Who Laughs' Directed by German expressionist filmmaker Paul Leni, the 1928 silent film The Man Who Laughs is an adaptation of the French novelist, the novel of the same name by Victor Hugo. Film critic Roger Ebert describes the film as a melodrama, sometimes even a swashbuckler, but so steeped in expressionist darkness that it plays like a horror film. The Man Who Laughs is famous for the scary, broad smile on the face of the main character Gwynplaine played by Conrad Veidt. The disturbing smile often leads viewers to confuse romantic drama with a horror movie. In fact, it was that famous bizarre smile that originally inspired the Joker's appearance. In 2005, a graphic novel called Batman: The Man Who Laughs revolves around the first time the hooded crusader encountered his arch-enemy The Joker. The title of the novel is clearly a nod to the original silent film that initially inspired the creation of the comic book villain. 'Taxi Driver' The famous 1976 neo-noir psychological drama 'Taxi Driver' revolves around the life of a war veteran named Travis Bickle, played by a young Robert De Niro, who suffers from insomnia and gradually loses control over reality while dreaming of saving a morally retarded world by murdering a presidential candidate and rescuing a young prostitute , played by Jodie Foster. Like Bickle, Arthur is often treated as a society outcast because of his mental health conditions. Both characters dream of saving the world in one way or another at the cost of their sanity and morality. Like Joker, Taxi Driver has sparked much controversy for his graphic depiction of violence, as well as by casting the film of a pre-candidate Jodie Foster as a prostitute. To this day, Taxi Driver is considered one of the greatest movies of all time. Taxi Driver star Robert De Niro also plays arthur feck's idol, television personality Murray Franklin in Joker. 'The King of Comedy' Robert De Niro's influence on Joker continues with director Martin Scorsese's 1983 psychological black comedy, The King of Comedy. The film revolves around a mentally disturbed and unsuccessful stand-up comedian named Rupert, played by De Niro, who develops an obsession with a successful artist and television personality named Jerry, played by Jerry Lewis. The film revolves around the dangers of celebrity worship with Rupert eventually going as far as kidnapping Jerry and arresting him for ransom. In Joker, the roles are reversed with Phoenix playing the role of the dangerously obsessed fan, Arthur, and De Niro acting as the subject of obsession Phoenix, Murray. Like Rupert in The King of Comedy, Arthur is also a failed stand-up comedian with a history of mental health issues. 'Henry: Portrait of a Serial Killer' In this creepy, creepy, Horror film, Michael Rooker plays Henry, a recently released convict who makes a living as a murderer, committing a series of brutal murders during his reign of terror and violence. Directed by John McNaughton, Henry: Portrait of a Serial Killer is based on the true story of serial killer Henry Lee Lucas, who was found responsible for hundreds of unsolved murders. The film contains both sexual and violent graphic material of nature, which played a major role in the development of the NC-17 classification. As Henry: Portrait of a Serial Killer, a main joker theme is the struggle to contain the inner darkness hidden within each individual. Both films are chilling character studies of untimable minds. In Joker, Arthur believes that his purpose in life is to spread laughter and happiness until a series of traumatic events spiral him into insanity. But be warned before you see this movie. Henry: Portrait of a Serial Killer is considered one of the most horrible and disturbing films ever released. The film took four years to have a theatrical release because the filmmakers took so long to find a studio willing to distribute such a hair-creation film. 'The Dark Knight' When The Dark Knight was released, audiences and critics praised the late Heath Ledger for his unforgettable and chilling performance as the Joker. At a time when comic films were often identified as children's films, The Dark Knight shocked audiences with its somber tone and a genuinely terrifying villain. Ledger and Phoenix's performances are unmatched, nor should they be compared because they are not even remotely similar to each other, but each performance is brilliant in its own way. Heath Ledger's Joker thrives on creating chaos and carnage wherever he goes, purely for his own sadistic entertainment. Joaquin Phoenix's Joker seems to act only violently when he is pushed to do so when he feels wronged or harmed by his future victims. Joker presented an interesting tribute to the acting style of Heath Ledger's method. Ledger carried a diary of characters full of scary drawings and mysterious messages to get into the character. In Joker, Arthur carries a similar diary, full of sketches, dark jokes and moving feelings about his suffering. 'You Were Never Really Here' Joaquin Phoenix's character in director Lynne Ramsay's action thriller is like a distorted reflection of Phoenix's character in Joker. The film revolves around a tired veteran named Joe, played by Phoenix, who embarks on a violent rescue mission to save a teenage girl, often resorting to brutally violent measures to do so. Joe and Arthur suffered from traumatic events that changed their lives forever as people, but in very Joe uses his violent and brutal nature for good intentions, while Arthur's intentions are more... morally questionable, to say the least. After checking out these movies, you'll be able to see admire Joker Todd Phillips in a new light. Light.
